### PROGETTO BTR

Le piastrelle sono prodotte con la speciale caratteristica dei Bordi a forma di Trapezio Rovesciato. L'originale formatura dei Bordi a Trapezio Rovesciato consente la posa più ravvicinata (almeno 2 mm), conferendo alla superficie la sensazione di continuità. Per evitare eventuali scheggiature, si raccomanda la massima attenzione e di non appoggiare le piastrelle in verticale senza l'originale imballo.

The tiles are produced with a particular system in order to obtain reversed conic edges. The original characteristic of the side of the tile, produced with the reversed conic edges enables the installation with very small joints (at least 2 mm) and gives to the surface a sensation of continuity. To avoid possible chips it is recommended to pay the maximum attention and not to place the tiles vertically without their original packing.
